

De la Metabúsqueda a la Inteligencia social

4 de julio de 2006

Hugo Agud
GreenData Library Technology
hagud@greendata.es

La necesidad de la metabúsqueda

- **Un incremento exponencial de recursos electrónicos disponible en las bibliotecas y centros de documentación**
- **Amplia oferta de proveedores y plataformas de acceso**
- **Elevado número de protocolos de intercambio de información**
- **Incremento de las exigencias de servicio de los usuarios**

El Metabuscador

- **Búsquedas simultánea en dos o más recursos-e**
- **Listado “Just in time” de resultados desduplicados**
- **Adaptación de la consulta en función del recurso de destino**
- **Otros servicios de soporte**

Limitaciones de la metabúsqueda

- **Limitaciones intrínsecas a la metabúsqueda**
 - **Catalogación heterogénea de los recursos-e**
 - **Diferencias entre Tesauros de catalogación**
- **Limitación de funcionalidades**
 - **Limitaciones de funcionalidades del motor de consulta**
 - **Limitaciones de funcionalidades de explotación de resultados**
- **Limitación de acceso a los recursos locales**

Situación del mercado español

- **Lanzamiento de los metabuscadores: 2000**
- **Situación actual**
 - **65 % de las instituciones del REBIUN tienen alguna solución de Meta búsqueda adquirida.**

Nuevos tiempos, nuevas necesidades...

- **Google, Amazon marcan tendencias**
- **Nuevas expectativas y exigencias de los usuarios**
 - **Nuevas herramientas centradas en el usuario**
 - **Inteligencia artificial y colectiva**
- **Nuevas tecnologías de intercambio de información**
 - **Web 2.0, RSS, SOA...etc**
 - **Clustering, faceting**

A qué nos enfrentamos...

- **Meta búsqueda es una condición necesaria pero no suficiente**
- **Necesidad de acceso global a la información, más allá de los recursos electrónicos de suscripción**
- **Necesidad de capitalizar el esfuerzo de catalogación de la biblioteca**
- **Necesidad de materializar la inteligencia social**
- **Necesidad de diferenciar la gestión de la información, de la explotación de la información**

Reviews:

- **Richard Hammer** rated this item **8/10** (21.8.05): "What a pleasure to find a book on this subject that's easy to read. Andrew Chak puts forward each principle clearly, with illustrations, then at the end pulls it all together in a demonstration of how it works in the context of one example." ([More](#))
- **Habdu Cherski** rated this item **5/10** (3.6.05): "While this book doesn't go into any great depth or subtlety, it is an excellent introduction to designing for commercial web sites. It requires no
